PROFESSIONAL SUMMARY

UI/UX Designer with just over three years of experience, all of it in fast-moving product teams building fintech and enterprise SaaS tools, KYC and payment flows, admin dashboards, and recruitment/HR platforms. I usually own a feature end-to-end: talking to users or stakeholders, sketching and testing flows, building the screens in Figma, and sitting with engineers through handoff to make sure what ships actually matches the design. I'm most interested in taking something confusing or clunky and making it feel obvious.

PROFESSIONAL EXPERIENCE

UI/UX Designer , Rupenet Technology Solutions Pvt. Ltd

Nov 2025 – Present

- Redesigned the customer and merchant onboarding flow, including KYC verification steps, working closely with compliance to figure out which checks could be simplified without cutting corners and the team tracked roughly a 25% drop in onboarding drop-off after launch.
- Designed payment workflows covering UPI, AEPS and IMPS transactions, plus internal dashboards operations staff use to monitor and act on transactions day to day.
- Started a shared component library in Figma so new screens didn't each reinvent spacing, color, and button states from scratch still adding to it as new patterns come up, and using it to speed up handoff conversations with engineering.

UI/UX Designer , SWITS Digital Pvt. Ltd

Sep 2024 – Sep 2025

- Designed the core recruiter-facing flows for an ATS product with job creation, candidate pipeline, interview scheduling, and offer approval working from early wireframes through to final specs.
- Designed HRMS modules including employee onboarding, attendance, leave requests, a payroll dashboard, and performance review forms.
- Drove 15% increase in user engagement by redesigning core workflows based on heuristic evaluation and usability research insights.
- Contributed CRM screens for lead management and pipeline tracking, and a reporting dashboard for the sales team.
- Sat in on sprint planning regularly with PMs and Developers a lot of the job was catching scope creep early and flagging when a 'quick' design request wasn't actually quick to build.

UI/UX and Graphic Designer , SmarteHop Mobility Pvt. Ltd

Aug 2023 – Sep 2024

- Designed the onboarding flow and core user journeys for the company's mobile app; engagement numbers the team shared with me showed around a 40% increase after the redesign shipped.
- Ran lightweight usability sessions (mostly informal, with friends-of-the-team and a few real users) to catch navigation issues before they went live.
- Built responsive web pages and marketing graphics to support product launches my first job, so a broader mix of design work than the fintech/SaaS-focused roles after it.

INDEPENDENT PROJECTS

Smaller projects done outside of full-time work — good practice, but on a much smaller scale than the roles above.

Risk & Audit Compliance Platform (freelance)

- Designed the core screens for logging risk items, scoring them, and tracking mitigation steps, plus a dashboard summarizing open items for an audit review

Noble Academy — EdTech Platform (freelance)

- Interviewed a handful of learners about where they were dropping off mid-course, mapped their journey, and redesigned the course-progress screens based on what came up.

Inspire Office Spaces – Real Estate Website

- Designed a responsive website improving navigation clarity and lead generation for a commercial real estate business.

SKILLS

ux Design	User research & interviews, user flows, wireframing, prototyping, interaction design, information architecture, usability testing
Design System	Figma (Components, Variables, Auto Layout), Reusable Component Libraries, Developer Handoff
Working style	Agile/Scrum, Sprint Planning, Cross-Functional Collaboration With PMs And Engineers

EDUCATION & CERTIFICATIONS

Bachelor of Technology

SRM Institute of Science and Technology, Chennai

- UI/UX Master Course - Ovi Design Academy
 - Google UX Design Professional Certificate - Coursera
 - UX Kickstarter - Growth School
-
